

UCSF seeks Nephrologists' and Transplant Physicians' preferences on kidney replacement therapies

Our goal is to learn more about the treatment preferences for both patients and nephrologists to better inform these innovations and their equitable use and to advance home-dialysis.

- This survey will help us learn more about nephrologists' and transplant physicians' treatment choices for kidney replacement therapies
- The anonymous online survey includes a series of choice tasks and additional questions about demographics
- The survey will take about 15 minutes to complete.
- You can skip questions that you do not want to answer or stop the survey at any time. The survey is anonymous, and no one will be able to link your answers back to you. Please do not include your name or other information that could be used to identify you in the survey responses.

Questions? Please contact Leslie Wilson, PhD (Study Principal Investigator) at Leslie.Wilson@ucsf.edu with questions about this study. If you have questions or concerns about your rights as a research participant, you can call the UCSF Institutional Review Board at 415-476-1814.
