Innovations in Regulatory Science Summit

Hosted by UCSF-Stanford CERSI as a pre-conference to the 2019 Annual J.P. Morgan Healthcare Conference

Saturday, January 5, 2019

Mission Bay Conference Center - 1675 Owens St, San Francisco, CA

Engaging stakeholders from academia, government and industry to support regulatory science and translational innovation

Featuring Panel Discussions:

- Artificial intelligence, Deep Learning and Novel Statistical Approaches: Is There a New Future for Clinical Development?
- Model-informed, Adaptive Clinical Trials to Accelerate Development and Evaluation of Next Generation Drugs and Biologics
- Accelerating the Approval of Innovative Devices to Mitigate Investment Risk
- The Evolving Regulatory Science of Digital Health
- Patient Participation and Real-World Evidence to Guide Regulatory Science
- Expertise vs Perceived Conflict of Interest: Best Practices for Physicians and Scientists to Advise Regulatory Agencies
- The Role of Academia, Government and Industry in Regulatory Science: New models for Cross-Sector Collaboration
- Advancing Discovery to First-In-Human Clinical Trials for New Medical Products
