

Panel 3: Real-World Evidence, Artificial Intelligence and Novel Medical Devices

Moderators:

Adam Gazzaley, MD, PhD - Professor of Neurology, Physiology and Psychiatry at UCSF

Anne Wojcicki - CEO of 23andMe

Panelists:

Russ Altman, MD, PhD - Professor of Bioengineering at Stanford

Edward Chang, MD - Professor of Neurological Surgery at UCSF

Daphne Koller, PhD - Founder & CEO of Insitro

Curtis Langlotz, MD, PhD - Professor of Radiology at Stanford

- **What are the earliest successful examples of real-world evidence and/or AI accelerating the evaluation of medical products?**
- **For novel and promising technologies in this space, how can we reduce uncertainty in the regulatory pathway?**
- **How can AI and real-world evidence be effectively utilized in the entire medical product lifecycle, from discovery through post-market?**
