

If connecting from outside the UCSF Network, including UCSF Guest wireless connections, you will need to use your Network Connect Application to connect to the UCSF Network

You will need to download the Network Connect application if you have not already done so. Please go to “<http://software.ucsf.edu/applications/vpn.html>” and download the “**Junos Pulse Client**”.

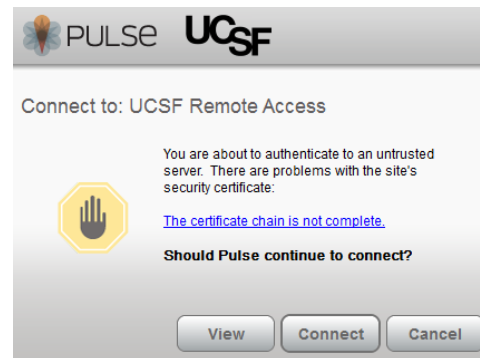

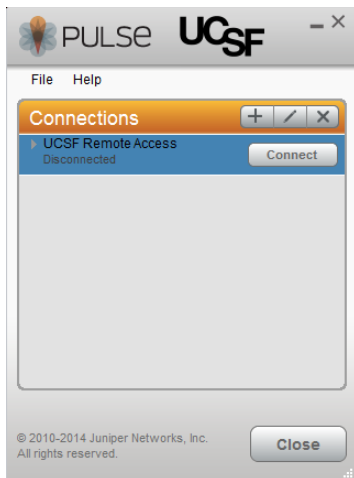

The screenshot shows the UCSF software@UCSF website. At the top, there is a navigation bar with the UCSF logo and links for "University of California, San Francisco", "About UCSF", "Search UCSF", and "UCSF Medical Center". Below this is the "software@UCSF" logo. The main content area is titled "UCSF Junos Pulse Client". Under "Documentation", there is a link for "Install and Use Windows and Mac Pulse Clients (PDF)". Under "Windows Downloads", there is a link for "Junos Pulse Client for Windows". Under "Mac OS X Downloads", there is a link for "Junos Pulse Client for Mac OS X", which is highlighted with a red arrow. Below this is the "ITS vpn@UCSF Network Connect Client" section, with "Documentation" and "Linux Downloads" links. At the bottom, there is a footer with contact information for UCSF IT and copyright information.

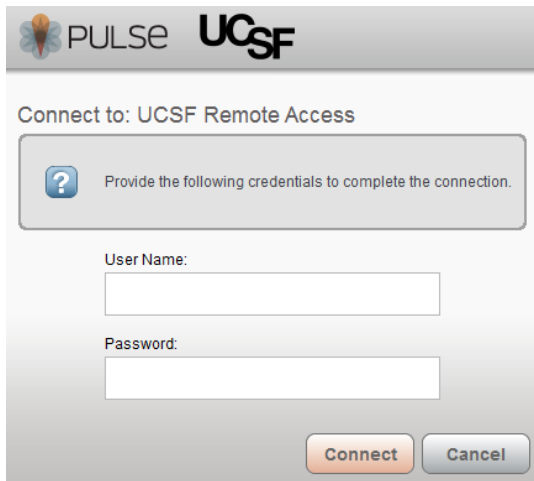

For **Windows users**, use “**Junos Pulse Client for Windows**” link and install the application.
For **Mac users**, use “**Junos Pulse Client for Mac OS X**” link and install the application

Once program is downloaded, open the “**UCSFWinPulseClient.exe**” installer and follow the steps to install the Junos Pulse Program.

When completed, double click the program, and you should see UCSF Remote Access with a connect button. Click the Connect button and click Connect again when prompted with security certificate notification.

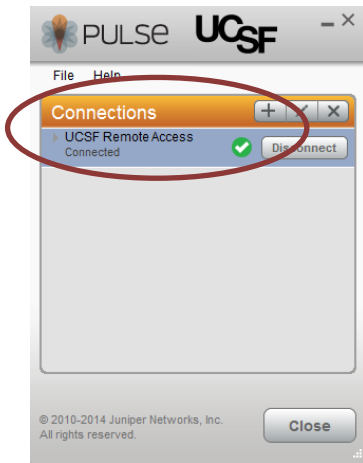

You will next be prompted to log in with your UCSF Credentials. (User Name and Password will be the same as your MyAccess Credentials)

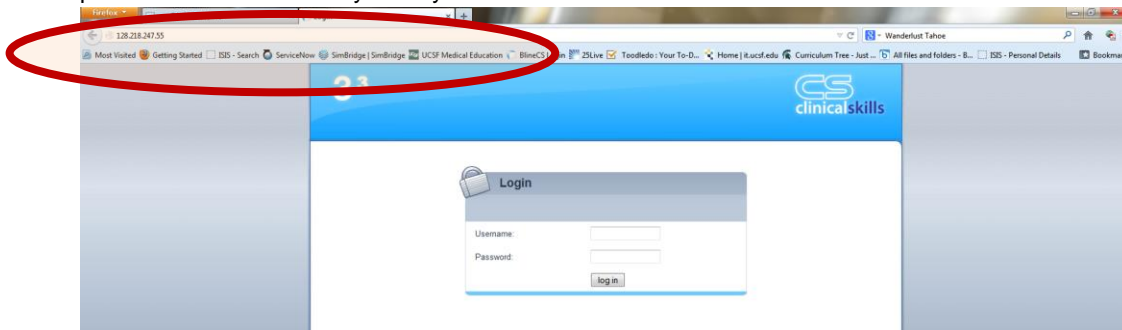

The image shows a dialog box titled "PULSE UCSF" with the subtitle "Connect to: UCSF Remote Access". Inside the dialog, there is a message: "Provide the following credentials to complete the connection." Below this message are two input fields: "User Name:" and "Password:". At the bottom right of the dialog are two buttons: "Connect" and "Cancel".

Once logged-in and connected, you will see the word "connected" and a green check mark on the Pulse window.

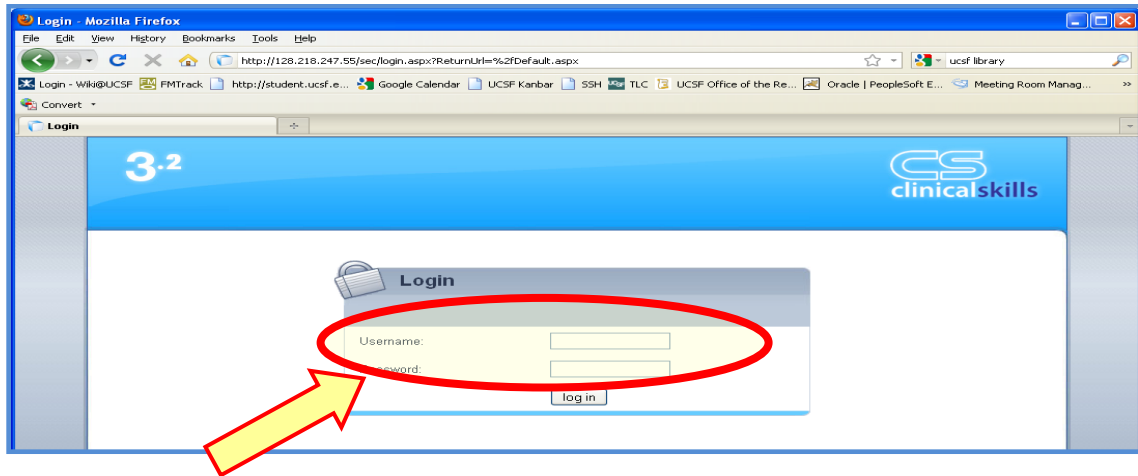

Now you can open any browser such as Chrome and Firefox.

1. Within the browser open a new tab or window and type **128.218.247.55** in the browser address field and press the enter button on your keyboard

2. You should now see the following B-line Clinical Skills logon window

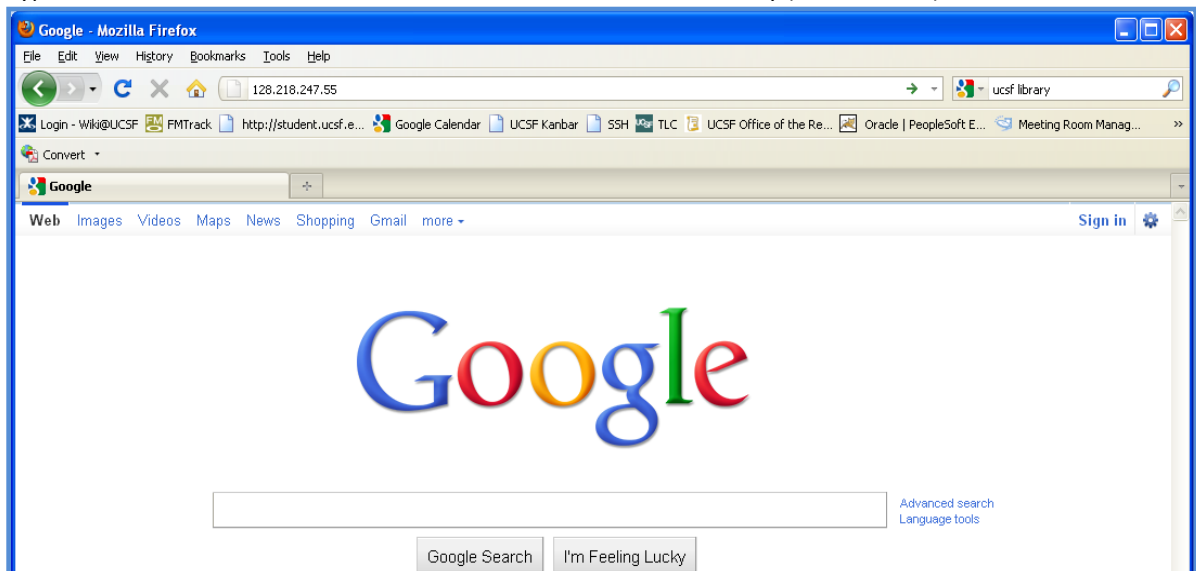

Username account information: The account name is the same account name you use to logon to UCSF Campus email. The account name is generally one of the three following options:

1. Last name and first initial (e.g. Michael Smith would be SmithM) and the password is the same password you use for your Campus email.
2. Student Campus ID number used for the UCSF MyAccess system (e.g. SF123456) and the password is the same password you use for your Campus email.
3. Issued user or group B-Line IDs and passwords on the day of the learning activity.

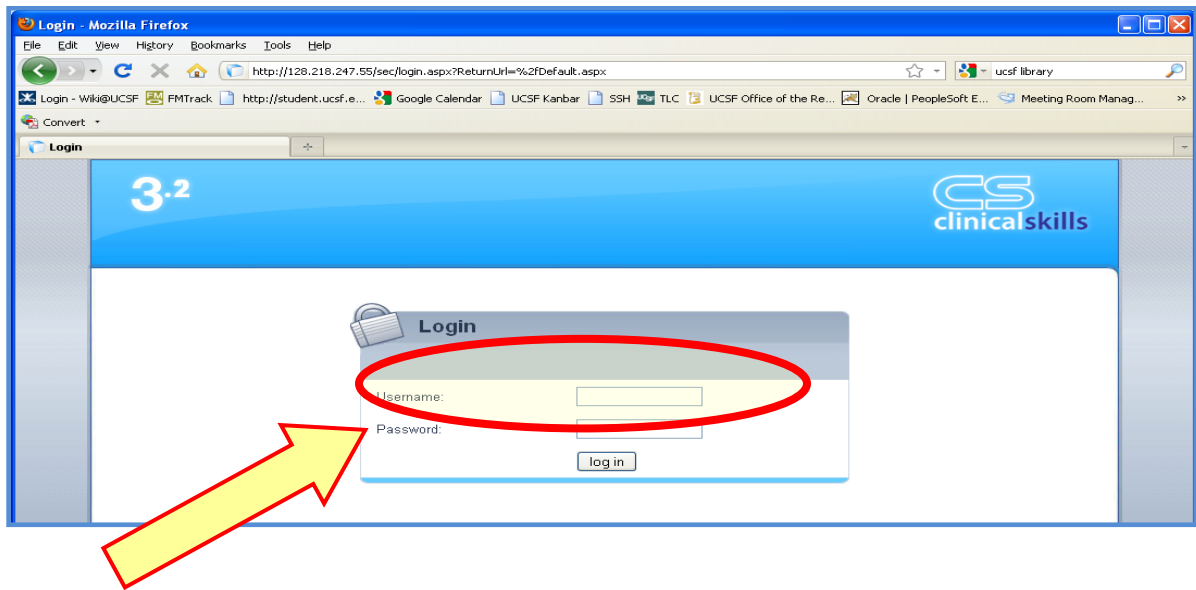

NOTE: UCSF Network connections, including UCSFWPA Wireless connections, can bypass the step of using the remote VPN@UCSF connection, and can connect directly to the B-line Clinical Skills interface.

Steps:

1. Open web browser (Firefox and/or Internet Explorer)
2. Type **128.218.247.55** in the Go To Address field and click the return key (enter button)

3. You should now see the following B-line Clinical Skills logon window

Username account information: The account name is the same account name you use to logon to UCSF Campus email. The account name is generally on of the two following options:

1. Last name and first initial (e.g. Michael Smith would be SmithM) and the password is the same password you use for your Campus email.
2. Student Campus ID number used for the UCSF MyAccess system (e.g. SF123456) and the password is the same password you use for your Campus email.
